

My Github Repo URL

W01-P1:create github repo -- 1112-2A-db-demo-id, git push w01 files

The screenshot shows the initial setup of a GitHub repository. On the left, the VS Code Explorer displays the file structure of the repository, including `bin`, `demo`, `node_modules`, `public`, `routes`, `views`, `app.js`, `note.txt`, `package-lock.json`, `package.json`, and `README.md`. The `.gitignore` file is highlighted, showing `node_modules` as the only ignored directory. The terminal window shows the execution of `git push`, which successfully pushes the initial commit to the `main` branch of the repository `aosihfvdp/1112-2A-db-demo-410410319`. The GitHub repository page on the right shows the commit history with the `w01 first commit` and the `Initial commit` by `aosihfvdp`.

The screenshot shows the repository after uploading additional files. In VS Code, the `demo` directory is expanded, showing `w01` and `w02` subdirectories. The `w01` directory contains `w01-p1.jpg` and `w01-p2.jpg`. The terminal shows the execution of `git push`, which successfully pushes the new files to the `main` branch. The GitHub repository page on the right shows the commit history with the `w01 first commit` and the `Initial commit` by `aosihfvdp`. The repository page also displays the file structure and the commit history.

W01-P2: copy crown themes over to public folder, npm run dev, show localhost:3000
